Professional Summary

Technical professional transitioning into Cybersecurity and Network Security, leveraging a background in analytical science. Hands-on experience in CCNA network architecture, penetration testing, and AWS cloud infrastructure. Skilled in vulnerability management, log analysis (Splunk), and secure full-stack development. Proven ability to troubleshoot complex technical environments and collaborate in agile teams to secure digital assets.

Skills

Technical Skills

- **Security & Analysis:** Penetration Testing, Ethical Hacking, Threat Analysis, Vulnerability Management, Log Analysis (Splunk)
- **Networking:** Routing & Switching Protocols, CCNA Architecture, Network Troubleshooting, TCP/IP, Network Security
- **Cloud & AI Infrastructure:** AWS Cloud Computing, Cloud Services Security, Generative AI Frameworks, Machine Learning
- **Systems & Software Development:** Linux OS, Full-Stack Web Development (MERN Stack: MongoDB, Express.js, React, Node.js)

Soft Skills

Analytical Problem-Solving, Technical Documentation, Critical Thinking, Agile Collaboration, Cross-functional Teamwork, Technical Presentations & Demos, Good Communication, Data Analysis & Reporting.

Experience

Cybersecurity & Network Security Trainee

DeKUT Networking Academy & Cyber Shujaa Program 2025 – Present

- **Network Security:** Configuring secure Cisco network architectures, implementing routing/switching protocols, and troubleshooting connectivity.
- **SIEM & Monitoring:** Utilizing Splunk to analyze machine data, monitor system logs, and identify security anomalies.
- **Ethical Hacking:** Performing penetration testing, network sniffing, and vulnerability assessments to map mitigation strategies.
- **Linux Administration:** Utilized Linux command-line environments for executing security scripts, managing system permissions, and configuring secure services.

Cloud Infrastructure & Software Development Trainee

AWS re/Start (2024) & Power Learn Project Academy (2025)

- **Cloud Security:** Deploying secure AWS environments using IAM, VPC, and compliance best practices.
- **Secure Development:** Building MERN stack applications with integrated JWT authentication and bcrypt password hashing.
- **AI Guardrails:** Evaluating data privacy and security frameworks within generative AI deployments via Deloitte/AWS training.

Projects

Tess' Corner – E-Commerce MVP (MERN-Stack Developer)

Technologies: *React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, JWT, bcrypt*
Hosting: *Vercel & Render*

- Architected and deployed a responsive, modern full-stack e-commerce platform using MongoDB, Express.js, React, and Node.js (MERN stack).
- Implemented secure user authentication, stateful shopping cart functionality, and seamless API integrations, ensuring a smooth and reliable user journey.

Work Experience

Laboratory Assistant (Intern/Trainee)

Nakuru Water & Sanitation Services Co. Ltd Feb 2023 – Apr 2023

- **Data Integrity & Analysis:** Conducted chemical and bacteriological analysis of potable water and wastewater samples, maintaining strict laboratory data integrity and compliance standards.
- **Process Quality Control:** Sampled and monitored water systems to identify variations in chemical and microbial metrics, reporting findings to ensure system-wide safety protocols were met.
- **Technical Documentation:** Maintained meticulously organized laboratory logs and compliance documentation, translating complex analytical data into clear, actionable safety reports.

Education

- **B.Sc. in Industrial Chemistry** – Dedan Kimathi University of Technology | 2024
- **Certificate in Information Technology** – Dedan Kimathi University of Technology | 2021

Certifications

- **CCNA (Routing, Switching, & Security)** – DeKUT Cisco Networking Academy (In Progress)
- [Cisco Ethical Hacker](#) – Cyber Shujaa Program | 2026
- [AWS Certified AI Practitioner](#) – Deloitte / AWS | 2026
- **Software Development (MERN Stack)** – Power Learn Project Academy | 2025
- [AWS Certified Cloud Practitioner](#) – AWS re/Start Program | 2024
